Good Faith Estimate

Under the law, if you do not use insurance, health care providers need to provide an estimate bill for treatment costs. A Good Faith Estimate is for the cost of non-emergency services. You may obtain this one business day before your session, or ask me at any time for a Good Faith Estimate before you schedule a service or treatment.

A bill of at least \$400 more than your Good Faith Estimate for each service can be disputed. Keep your Good Faith Estimate for your records.

Questions? or more information needed about your rights to a Good Faith Estimate?
